Athens / Greece

SUMMARY

I am a solution driven person. I react quickly to shifting priorities and focus on meeting my deadlines.

Proactive, confident and with a positive "can-do" attitude when things go wrong. Love following latest tech standards, but my focus is on delivering results.

HOW I SPEND MY FREE TIME

WHAT I'M PROUD OF

Designing Effective Solutions

For every problem there is a solution in the modern tech world. Balancing the needs versus the time and cost of a solution makes all the difference in the end of the day.

On time Delivery

I always meet the deadlines given for all my projects. I am quick to identify shortcomings and manage them in order to achieve the result needed.

Reaching Targets

It's one thing to build something awesome and an other to build something that works. Getting stuck in never ending QA cycles or the fear of accountability is the most common culprit in modern companies and development teams. In the end what's important for a company is their target to be met.
